EXPERIENCE

SPENDFIGO

Mobile Application Developer (Flutter)

Lagos, NG

Feb 2026 – Present

- Building and maintaining a consumer-facing Flutter mobile application, implementing complex state management, pagination, and infinite scrolling for seamless in-app content exploration.
- Developed secure OAuth sign-in flows (Google & Apple), managing session lifecycles to keep users authenticated without compromising security posture.
- Enforced mobile app security best practices — zero secrets in the codebase, encrypted storage for sensitive data, and obfuscation to protect against reverse-engineering and unauthorized access.
- Translated Figma designs into pixel-perfect, production-ready Flutter UIs with smooth animations, contributing to measurable improvements in user retention and engagement.

TORONET

Senior Mobile Engineer (Flutter)

Lagos, NG

Sep 2025 – Present

- Engineered and shipped the Toronet Wallet mobile app using Flutter, delivering a multichain crypto wallet with cross-chain asset management, real-world payment support, and instant fiat conversion across NGN, USD, EUR, GBP, KES, EGP, and ZAR.
- Built and automated CI/CD pipelines that streamlined releases across multiple environments, reducing deployment friction while maintaining reliability, speed, and compliance in a fast-paced blockchain ecosystem.
- Integrated blockchain technologies seamlessly into Flutter mobile experiences, designing flows that abstracted wallet interactions, transaction signing, and network communication for end-users.
- Led mobile engineering with a security-first mindset — enforcing secure session management, protecting sensitive keys and blockchain credentials, and hardening the app against reverse-engineering.

GRAYCREST

CTO / Lead Flutter Engineer

Lagos, NG

Apr 2025 – Present

- Leading all technical strategy and delivery at a premium technology studio specialising in mobile apps, DevOps, and cloud solutions, overseeing architecture decisions across 50+ delivered projects.
- Architecting and building enterprise-grade Flutter mobile applications and web platforms with a focus on reliability, security, and scalability for clients across multiple industries.
- Established DevSecOps-first pipelines and cloud infrastructure (GCP, AWS) to guarantee system uptime and security-hardened deployments, eliminating post-launch surprises for clients.
- Directing a cross-functional engineering team, setting coding standards, conducting code reviews, and cultivating a high-performance culture aligned with measurable client outcomes.

ENSAKE (Contract)

Mobile Engineer (Flutter)

Lagos, NG

Sep 2025 – Dec 2025

- Turned Figma designs into smooth, production-ready Flutter mobile experiences, building complex state management with pagination and infinite scrolling for uninterrupted content browsing.
- Built secure and reliable sign-in flows with Google and Apple authentication, managing tricky session lifecycles to keep users logged in seamlessly.
- Implemented mobile app security standards — no secrets in the app, safe storage for sensitive data, and codebase protection against reverse-engineering and unauthorized access.

EASYSPEND CC

CTO / Senior Mobile Engineer (Flutter)

Lagos, NG

Jan 2025 – Sep 2025

- Leveraged Shorebird, Codemagic, GitHub Actions, and Sentry to streamline mobile DevSecOps, achieving a 75% reduction in build and deployment time and enabling 95% faster release cycles for critical hotfixes.
- Engineered intuitive Flutter UI and captivating animations, driving a 25% surge in user retention and a 10% monthly uptick in user acquisition.
- Directed a team of developers, consistently meeting project deadlines and cultivating a high-performance engineering culture.

SUMMARY

Senior Flutter Mobile Engineer with 5+ years of experience delivering production-grade mobile applications across fintech, blockchain, and consumer platforms. Proven track record building secure, performant, and scalable Flutter apps for iOS and Android, leading engineering teams, and owning the full mobile DevSecOps lifecycle from CI/CD pipeline setup to app store delivery. Passionate about clean architecture, security-first development, and crafting intuitive user experiences that drive real business results.

TECHNICAL SKILLS

- Mobile Development: Flutter, Dart, FlutterFlow
- State Management: Riverpod, BLoC, Provider, GetX
- Backend & APIs: Python, TypeScript, Firebase, Supabase, REST, GraphQL
- Mobile DevSecOps: Codemagic, Shorebird, GitHub Actions, Sentry, Fastlane
- Cloud Services: Google Cloud Platform (GCP), AWS
- Security: Secure storage, certificate pinning, obfuscation, OAuth 2.0, session management
- Blockchain: Wallet integration, transaction signing, multichain mobile UX

EDUCATION

BELLS UNIVERSITY OF TECHNOLOGY

Bachelor of Engineering (BEng) – Mechatronics Engineering

Lagos, NG

2020 – 2025

ADDITIONAL INFORMATION

- Languages: Fluent in English (written and oral).
- Volunteering: Mobile Applications Development Team Lead, Google Student Developer Clubs (2023–2024).
